Dear Japanese and Scandinavian Colleagues!

It is a great pleasure and honour to welcome you to the 12th Symposium for the Japanese Scandinavian Radiological Society (JSRS) and the 15<sup>th</sup> Nordic Japan PACS Symposium in Bergen 13-15 June, 2018.

The conference venue is Grand Hotel Terminus, a classic continental hotel and conference centre beautifully located in downtown Bergen and within walking distance to some of the most famous sightseeing attractions in Bergen.

Progress in Radiology 2018 is organised in collaboration with The Norwegian Radiological Society, Haukeland University Hospital and the University of Bergen. This conference aims to promote the exchange of scientifically based radiological skills and to build professional networks between Scandinavian and Japanese radiologists. The organising committee endeavours to host “Progress in Radiology 2018” in a similar successful manner as JSRS’s previous symposiums in Japan in 2016 (with Prof. Yamada as President) and in Finland in 2014 (with Prof. Aronen as President) as well as the many preceding meetings.

The symposium will, similar to previous years, cover topics ranging from oncologic imaging, cardiovascular imaging, interventional radiology, breast imaging, nuclear medicine and molecular imaging to PACS related topics. The scientific program of the conference will, however, be very much influenced by the submitted abstracts and the oral presentation proposals from the participants. I hereby encourage all participants to submit their abstracts in due time and thereby actively participate in creating an interesting and diverse programme for this symposium.

June is normally a very good month to visit Bergen and the west-coast of Norway with long and sunny days, and I hope that you will use this opportunity to come to Norway and thereby support the continued success of the JSRS.

We look forward to seeing you in Bergen!

On behalf of the organising committee

President:

Prof. Ingfrid S. Haldorsen,  
Department of Radiology  
Haukeland University Hospital,  
Bergen, Norway
